Comprehensive Opioid Response Symposium

In 2022, Georgia lost 1,601 lives from fentanyl-involved overdoses – that's an increase of 308% in a span of only three years.

Interactive Learning Experience for Professionals

This free one-day, in-person symposium will build upon the considerable strengths and existing clinical knowledge in our community to create a comprehensive opioid response (COR) for addiction throughout the state of Georgia. Community-level partnerships and tailored strategies are critical for supporting our communities and implementing a successful response to this epidemic.

Attendees will have ample opportunity to engage with experts across clinical, medical, and peer recovery fields through a variety of panel discussions. This year's symposium will focus on key topics such as:

- Epidemiology
- Medication for opioid use disorder (MOUD)
- Evidence-based psychosocial therapies
- Peer-supported recovery.

All lectures will meet the requirements of the Medication Access and Training Expansion (MATE) Act.
